All supplies must be labeled with student's name

BYOD - Bring Your Own Device

Moving back into the classroom will result in a number of protective procedures outlined by Alberta Education. Due to the nature of learning for the foreseeable future and to limit the possible spread of illness, we recommend each student have a personal, robust devices. However, as a school, we do not have the capacity to supply 1-to-1 computing to students. We are asking those parents, who are able, to provide a Chromebook for the year. Those families who are unable to supply one, we will do our best to provide one from the school.

For a device, we recommend a Chromebook. They are relatively inexpensive and work seamlessly with the Google environment used by all St. Albert Public Schools. Purchasing a new Chromebook gives you a device that should last through to the conclusion of High School. Mac/Windows laptops are acceptable but are expensive and have increased security risks. Tablets are not robust enough for our educational purposes.

There are a number of options and brands available for Chromebooks such as Acer, Asus, and Lenovo to name a few. Additionally, there are a number of additional options available such as larger screens, touch capable, and tablet models. A base Chromebook is typically a keyboard and 11" screen with a built in camera with 4GB of memory and 16GB of storage for a price just under \$300. Staples, Costco, Memory Express, and many other can provide these devices.

If you have questions or concerns please contact school and Mr. Matt Tripp, our assistant principal, can assist you best as he is very well versed in the Chromebook environment.

Dear Parent/Guardian,

This is the 5th year that Staples – St. Albert will be providing students of St. Albert Schools with devices for the One-to-One Learning Program. The One-to-One Program means students can bring their own devices to school for educational purposes.

The value of having a reliable source of high quality products and customer service is important to the school, the district, and to all the students and their families. We are proud to partner with Parents and Guardians like you to provide a total solution.
